

# Fact Sheet: Algiers Point Recovery Roads Repairs

City of New Orleans  
Department of  
Public Works

## Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

## Project Facts:

**Phase I:** Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55,200,000. The total cost of Phase I repairs completed in the Algiers Point were approximately \$80,000.

**Phase II:** The Algiers Point Recovery Roads program will include multiple construction repair projects with a total estimated value for roadway improvements of approximately \$500,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Algiers Point construction is scheduled to begin in Spring 2017 and last through Spring 2018. Road resurfacing work will be limited in some areas of Algiers Point.

## What to expect during construction:

Residents and businesses in Algiers Point should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Algiers Point engineering and design firm is Richard C. Lambert Consultants. The construction contract is scheduled to be available for bid in early 2017.

## Funding Facts:

| Neighborhood Area            | Phase of Work | Consultants                    | Total Estimated Repairs |
|------------------------------|---------------|--------------------------------|-------------------------|
| Phase I Completed Repairs    | Completed     | NA                             | \$80,000*               |
| Phase II Estimated Repairs   | Design        | Richard C. Lambert Consultants | \$500,000*              |
|                              | Construction  | To Be Determined               |                         |
| TOTAL Repairs— Algiers Point |               |                                | \$580,000*              |

\* FEMA inspectors will be working onsite with the City's design and construction contractor teams. During construction they are likely to identify additional storm damages that may be eligible for repair. In many cases it is likely the scope of work may be adjusted to include additional repairs.
